Database Settings

Database password

You can use this password to connect directly to your Postgres database.

Reset database password

Connection pooling configuration Shared Pooler

Docs

Pool Size

15

The maximum number of connections made to the underlying Postgres cluster, per user+db combination. Pool size has a default of 15 based on your compute size of Nano.

Max Client Connections

200

The maximum number of concurrent client connections allowed. This value is fixed at 200 based on your compute size of Nano and cannot be changed.

Please refer to our documentation to find out more.
